

We have faith in future generations. We respect our forefathers for giving us the opportunity to plan our communities. Measure L takes that right away from the next two or three generations.

The proponents of Measure L falsely claim that the Oxnard city council can rezone land that is beyond the city limits. How can that be? The city council has no ability to change land use designations on land that is not part of Oxnard.

The proponents of Measure L used the term "urban sprawl" six times in their arguments, which is intended to scare voters. Voters shouldn't be threatened. They should participate. We need to assure our future generations have the ability to participate in the shaping of their community.

Vote NO on Measure L and YES on Measure K.
