1. ENGINEERS LETTER

WHEREAS, on June 1, 2021 the City Council of the City of Oxnard (the "City"), State of California, under the Landscaping and Lighting Act of 1972 (the "Act") adopted its Resolution Initiating Proceedings for the Annual Levy and Collection of Assessments and ordered the preparation of an Engineer's Report for the City's Landscape Maintenance Districts (the "Districts") for Fiscal Year 2021/22.

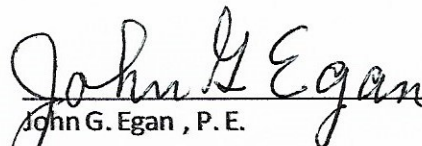

WHEREAS, the Resolution Initiating Proceedings directed NBS to prepare and file a report presenting plans and specifications describing the general nature, location and extent of the improvements to be maintained, and an estimate of the costs of the administration, maintenance, operations and servicing of the improvements for Fiscal Year 2021/22. The report includes the diagrams for the Districts, showing the area and properties to be assessed, and assessing the net amount upon the assessable lots and/or parcels within the Districts in proportion to the special benefit received.

NOW THEREFORE, the assessments as detailed in this Engineer's Report and as summarized in the table below are made to cover the portion of the estimated costs of maintenance, operation and servicing of said improvements to be paid by the assessable real property within the Districts in proportion to the special benefit received. The breakout by District is shown on the following pages.

District	Total 2021/22 Levy Amount ¹
Landscaping and Lighting Assessment Districts (1972 Act) Listed in this Engineer's Report	\$1,603,521.07

(1) The Total 2021/22 Levy Amount includes may differ slightly from the Assessment Rolls attached as appendices in this report due to rounding adjustments required for County Tax Roll submission.

I, the undersigned, respectfully submit this Engineer's Report and, to the best of my knowledge, information and belief, the Engineer's Report, Assessments, and the Assessment Diagram herein have been prepared, computed and levied in accordance with the assessment methodology adopted, approved and ordered by the City Council of the City of Oxnard at the time of District formation.

John G. Egan, P. E.
Assessment Engineer

The following table shows the anticipated 2021/22 levy, the actual assessment rate per parcel/benefit unit/acre being levied and the maximum assessment rate per parcel/benefit unit allowed.

2. INTRODUCTION

2.1 Background

The City incorporated in 1903. Currently, the incorporated limits of the City include approximately 25 square miles. The City is located on the shores of the Pacific Ocean in the western portion of Ventura County. The City enjoys direct access to U.S. 101 Freeway and Pacific Coast Highway 1. The City is the largest City in Ventura County with a population of just over 200,000, accounting for approximately twenty-four percent (24%) of the County's population¹.

The City has utilized special financing districts as development has occurred within Oxnard. More specifically, the City has utilized assessment districts as a financing mechanism to help fund the ongoing maintenance of various public improvements within these developments, along with providing various types of maintenance services.

The City has used assessment districts for several decades, and industry best practices in managing such districts have changed substantially during that time. In the past twenty (20) years alone, there have been various legislative and judicial changes to assessment districts that impact the way the City should manage its Districts in today's legal landscape.

2.2 Process for Annual Assessment

As required by the procedures specified in the 1972 Act, an Engineer's Report must be prepared on an annual basis which contains a full and detailed description of the improvements, the boundaries of the assessment district and any zones therein, and the proposed assessments upon assessable lots and parcels of land within the Districts.

The City Council must also annually adopt a resolution of intention which:

- Declares the intention of the City Council to levy and collect assessments within the assessment district for the fiscal year stated therein.
- Generally, describes the existing and proposed improvements and any substantial changes proposed to be made in existing improvements.
- Refers to the assessment district by its distinctive designation and indicate the general location of the district.
- Refers to the report of the engineer, on file with the City Clerk, for a full and detailed description of the improvements, the boundaries of the assessment district and any zones therein, and the proposed assessments upon assessable lots and parcels of land within the district.
- Gives notice of the time and place for public hearing by the City Council on the levy of the proposed assessment.
- States whether the assessment is proposed to increase from the previous year.

If the assessments are to be levied in the same or lesser amounts than the maximum assessment allowed, the City Clerk shall give notice of the public hearing by causing the resolution of intention to be published. Any interested person may, prior to the conclusion of the public hearing, file a written protest which shall state all grounds of objection. The protest shall contain a description sufficient to identify the property owned by the property owner filing the protest. During the course or upon conclusion of the hearing, the City Council may order changes in any of the matters provided in the report, including changes in the improvements, any zones within the assessment district, and the proposed diagram or the proposed assessment. If the assessment to be levied exceeds the maximum assessment allowed, the City must comply with the procedures specified in Article XIII D and Proposition 218.

The City Council, upon conclusion of the public hearing must then adopt a resolution confirming the diagram and assessment, either as originally proposed or as changed by it. The adoption of the resolution shall constitute the levy of an assessment for the fiscal year referred to in the assessment.

3. PLANS AND SPECIFICATIONS

The Districts provide for the continued administration, maintenance, operation, and servicing of various improvements located within the public rights-of-way and dedicated easements benefiting the Districts. The following provides the general description of the improvements maintained by the Districts. Please note, the improvements authorized to be maintained are District-specific and vary between the Districts. Please refer to the District 1998/99 or formation Engineer's Report referenced in Section 10.7 for the specific authorized improvements.

3.1 Description of Boundaries of the Districts

A table listing each of the Districts and the general locations and boundaries, based on the assessment diagrams approved at formation of the Districts, as confirmed by a boundary audit can be found in Section 10.1.

3.2 Description of Improvements and Services

A detailed description of each of the Districts and description of services can be found in Section 10.2 and the general location of the improvements can be found in Section 10.3 of this Report. Please refer to the District 1998/99 or formation Engineer's Report referenced in Section 10.7 for the District specific description of authorized improvements and services.

The improvements are generally described as: the construction, operation, maintenance and servicing of landscaping, lighting and appurtenant facilities including, but not limited to, personnel, electrical energy, utilities such as water and gas, materials, contracting services, and other items necessary for the satisfactory operation of these services described as follows:

The improvements authorized to be maintained are District-specific and vary between the Districts, the improvements provided may include, but are not limited to: ground cover, turf, trees, shrubs, the landscaped areas of detention basins, screen walls/fencing, park benches, trash containers, overhead structures, theme light poles, ornamental lighting, and sprinkler, irrigation and drainage systems, and may also include sidewalk and hardscape improvements along the landscaping, entry monuments, mailboxes and associated appurtenant facilities. Park improvements, if applicable, vary by park and may include landscape and open space, playground structures, exercise stations, restrooms, benches, picnic tables, and litter receptacles.

Maintenance provided includes all necessary services, operations, administration and maintenance required to keep the above-mentioned improvements in a healthy, vigorous and satisfactory condition which may include, but is not limited to: repair, removal or replacement of all or any part of the landscaping, sidewalks, theme light poles or screen walls/fencing. Provision for the life, growth, health, and beauty of the landscaping, including cultivation, irrigation, trimming, mowing, spraying, fertilizing and treating for disease or injury. The tree trimming may not occur on an annual basis; therefore, the assessed amount is for the average annual cost. Removal of trimmings, rubbish, graffiti, debris and other solid waste from the landscaped areas, detention basins and screen walls/fencing.

3.2.1 LANDSCAPING IMPROVEMENTS

The overall appeal and safety of an area is enhanced when landscaping improvements are in place and kept in a healthy and satisfactory condition. In addition, aesthetically pleasing landscaping welcomes users to walkways. Conversely, appeal and safety decreases when landscaping is overgrown, unsafe or destroyed by the elements or vandalism.

Landscaping improvements were installed along the roadways of each District in order to create a common theme and neighborhood identity for parcels. Landscaping may include, ground cover, turf and mulch, trees, shrubs and landscape up-lighting and sprinkler, irrigation, and drainage systems, and may include sidewalk and hardscape improvements along the landscaping.

3.2.2 STREET TREE IMPROVEMENTS

Street tree improvements were installed along the roadways of each District in order to create a common theme and neighborhood identity for parcels. Aesthetically pleasing street trees welcomes users to walkways, and shade tree canopies encourages use even during the hottest times of the year.

3.2.3 PARKS IMPROVEMENTS

Park facilities enhance the overall quality of an area and are an important component of complete and sustainable neighborhoods. The parks within the Districts, when included, offer both active and passive recreational opportunities: a place to play, exercise, spend time with neighbors, or to relax. The parks within the Districts are developed and maintained to appeal to all age groups and interests and promote a healthy community. Recreation and park facilities have proven to be a potent factor in maintaining a high standard of livability in the community.

There are two types of parks within the Districts: mini parks and neighborhood parks. Mini parks are intended to serve a limited population within a short radius (usually less than one-third of a mile) and neighborhood parks are intended to be easily accessible to local residents and designed to serve the surrounding neighborhood.² Park improvements vary by park, and may include landscape and open space, playground structures, exercise stations, restrooms, benches, picnic tables, and litter receptacles.

3.2.4 OVERHEAD

In addition to the actual costs of maintaining the improvements mentioned above, the City will incur costs for staff time and expenses directly related to the administration and management of the Districts. Staff time includes the oversight and coordination of both City and contractor provided services, creation of an annual engineer's report and resolutions, tax roll preparation, and placing the assessment amounts onto the County tax roll, along with responding to property owner inquiries. The management of the Districts, including the related use of consultants and the County, confer solely a special benefit to the Districts and no general benefit as may be the case with the improvements.

3.3 Location of Improvements

In Fiscal Year 2017/18 improvements along major traffic corridors were removed from the Districts and responsibility for their maintenance was transferred to the City. Refer to Section 10.3 for the updated maps showing the approximate location (for reference only – many not include all) of the authorized improvements applicable to each District, including landscaping, parks, trees, and sidewalks to be maintained by the Districts.

4. BENEFITS FROM IMPROVEMENTS

4.1 Special Benefits Identified

The improvements are expected to confer certain special benefits to parcels within each applicable District. The special benefits created by the improvements, which apply to the Districts as well as to properties outside the Districts and the public at large, may include the following:

Improved Aesthetics:

Street landscaping improvements improve the livability, commercial activity, appearance, and desirability for properties within each applicable District. Regular maintenance ensures that the improvements do not reach a state of deterioration or disrepair so as to be materially detrimental to properties adjacent to or in close proximity to the improvements within each applicable District. According to the Victoria Transport Policy Institute (2011), streetscapes have a significant effect on how people view and interact with their community. With streetscapes that are safe and inviting, people are more likely to walk, which can help reduce automobile traffic, improve public health, stimulate local economic activity, and attract residents and visitors to the community³.

The park improvements provide beautification, shade, and enhancement to properties, which creates a sense of community for the parcels within each applicable District. The overall appeal and desirability of an area is enhanced when public parks and recreational facilities are in place, improved, operable, safe, clean, and maintained. Conversely, appeal and desirability decrease when park and recreational facilities are unsafe or destroyed by the elements or vandalism. According to The Trust for Public Land, Corporate CEOs say that employee quality of life is the third most important factor in locating new businesses⁴.

Increased Safety

Safety for pedestrians involves not only a degree of protection from vehicular accidents, but also from criminal activity. Well maintained areas mitigate crime, especially vandalism, and enhance pedestrian safety. A recent study found that after landscape improvements were installed, there was a 46% decrease in crash rates across urban arterial and highway sites and a second study reviewed found a 5% to 20% reduction in mid-block crashes after trees and planters in urban arterial roads were put in place. In addition, there is less graffiti, vandalism, and littering in outdoor spaces with natural landscapes than in comparable plant-less spaces⁵. The Victoria Transport Policy Institute has found that streetscapes reduce traffic speeds and when combined with improved pedestrian crossing conditions can significantly reduce collisions⁶.

Economic Activity

Well maintained street landscape improvements not only make adjacent properties appear more stable and prosperous but can spur investment in the property. According to the Federal Highway Administration, landscaped sidewalks create an inviting place for customers to shop and do business⁷.

Parks attract both businesses and residents to communities. Making neighborhoods more friendly and enjoyable increases home ownership, creates jobs, and promotes positive consumer behavior. The desirability of properties for development increases based on the parcel's proximity to parks, sidewalks and trails⁸.

4.2 District-Exclusive Special Benefits Identified

Based on the location and improvement types, the following special benefits are exclusive to the properties and residents/visitors within the Districts.

Improved Air Quality

Plants, shrubs and turf remove pollutants from the air including smoke and dust⁹. Residents within the Districts directly benefit from the trees inside of and surrounding their communities. One tree can remove an estimated 26 pounds of carbon dioxide annually from the atmosphere¹⁰.

Traffic Screen

Landscaping creates a barrier between properties within the District and the exterior streets, offering privacy and reducing street/traffic noise and headlight glare¹¹.

Conserve Natural Resources

Trees shading homes reduce temperatures and further allow for air conditioning units to run more efficiently¹². According to the California Energy Commission: "Planting the correct trees, shrubs, vines and groundcover can make your home both warmer in the winter and cooler in the summer. In fact, the right type of tree can reduce your summer cooling costs by 20 to 40 percent!"¹³

Increased Job Satisfaction and Productivity

Studies have shown that employees with views of landscaping have greater satisfaction than those with no view. Also, psychologists have found that workers with access to plants and landscaping tend to be more productive¹⁴.

Increased Community Appeal

Cohesive landscaping increases the appeal of a community. Park and streets trees have been perceived to have high value (second only to education) of services offered by a municipality¹⁵.

Overall Livability

As a result of the collective improvements being maintained, the overall livability within each District will increase. The Victoria Transport Policy Institute expands on the concept of livability and the various benefits associated with that designation:

*"The livability of an area increases property desirability and business activity. Livability is largely affected by conditions in the public realm, places where people naturally interact with each other and their community, including: streets, parks, transportation terminals and other public facilities. Livability also refers to the environmental and social quality of an area as perceived by employees, customers and visitors. This includes local environmental conditions, the quality of social interactions, opportunities for recreation and entertainment, aesthetics, and existence of unique cultural and environmental resources."*¹⁶

4.3 General Benefits Identified

General benefit is an overall and similar benefit to the public at large resulting from the maintenance activities to be provided by the assessments levied. The improvements to be maintained by the District are located within the District boundaries.

The landscaping, tree and park improvements provide aesthetic, safety and economic benefits to the property within the District, but it is recognized that the ongoing District maintenance activities will also provide a level of benefit to some property within proximity to the District, as well as visitors and individuals passing through the District. Traffic from property within and outside of the District as well as individuals passing through the District area will be able to utilize the park improvements and view the maintained landscaping and trees. Therefore, the general benefit created as a result of the District maintenance activities has been considered.

Benefit to Property within Proximity but Outside of the Districts (General Benefit)

The landscaping, tree and park improvements will provide a level of improved aesthetic, increased safety, and economic activity benefits to some property outside of the Districts, but within proximity to property within District's boundary. In addition, people living outside of the Districts have access to and use of the parks. Since these benefits are conferred on properties outside of the Districts, this is considered to be a general benefit.

Benefit to Pass Through Traffic and Public at Large (General Benefit)

People and vehicles traveling through the Districts may receive a level of improved aesthetic, increased safety, and economic activity benefits from the maintenance of the landscaping and tree improvements. Since these benefits are conferred on pass through traffic and the public at large, this is considered to be a general benefit.

5. QUANTIFICATION OF BENEFIT

As a result of the maintenance and operation of the authorized improvements, there will be a level of general benefit to people that do not live in or intend to conduct business within the Districts. In order for property within the Districts to be assessed only for that portion of special benefits received from the District's maintenance activities, general benefits provided by the ongoing maintenance of the improvements need to be quantified. The amount of general benefit that is provided from the District's maintenance activities cannot be funded via property owners' assessments.

5.1 Benefits from Landscaping and Street Tree Improvements

The separation of special benefits conferred to the properties in the Districts from the general benefits conferred to people or property outside the Districts corresponds to the physical location of the improvements. Based upon the location of the improvements, the improvements are categorized into one of the following categories: exterior or interior streets. The streets classified as exterior primarily include arterial and collector streets that are designed to carry pass-through traffic and internal traffic movement throughout the City. The streets classified as interior are primarily those adjacent to homes and intended to serve the local community with fewer average daily trips (ADT) than those classified as arterial and collector. For detailed traffic calculation information, see Section 10.6.

In March 2017, at the direction of the City Council, an analysis was prepared that removed the improvements on arterial (major traffic corridor) streets. Districts, which contained improvements only on arterial streets, were dissolved as of the Fiscal Year 2017/18. The improvements on exterior streets located in the remaining Districts as detailed below are only included on local and collector streets.

Exterior Streets

The streets bordering each District, categorized as exterior, are used as main access points to and from properties within the Districts in addition to providing circulation between the interior streets and the City's roadway network. The exterior streets with landscaping improvements serve not only residents in the immediate vicinity, but persons who live outside of the Districts and are passing by. The City's recent traffic studies do not identify the percentage of traffic on exterior streets which is pass-through traffic.

Before the determination and allocation of the percentage of special and general benefit for the exterior streets can be made, the estimated pass-through traffic must be computed. In lieu of having a study that identifies the pass-through traffic on exterior streets, the estimated number of trips generated by each parcel within the Districts has been calculated and analyzed in combination with the City's most recent traffic study that provides the ADT on various sections of the exterior streets throughout the City.

For each District and for only those streets with improvements authorized to be maintained, the estimated number of trips for special benefit purposes (as determined by the projected trips generated by the District parcel characteristics), was calculated on the collector streets to estimate pass-through trips. The pass-through trips are vehicles driving along the maintained streets within the District for a portion of their trips, but not residing or conducting business within the District. Adjustments to traffic counts utilized neighborhoods surrounding each District with access points on the specified collector street; based on the

trips generated by those neighborhoods averaged by the number of access points on the specified collector street.

Interior Streets

The streets within each District categorized as interior were intended to serve individual neighborhoods and not pass-through traffic. From a visual inspection of the layout of each District, one must conclude the interior streets are exclusively intended for the benefit of the parcels on such streets. There is no local street that provides a direct or efficient means of traveling from one place to another such that one would reasonably expect a driver to purposefully choose these interior streets as the best route for travel through the City unless necessary because the route either began or ended with a parcel in the District. A route beginning or ending with a parcel within the District does not include the “general public” for purposes of determining general benefit.

However, given the location to the schools, parks, and commercial properties within the City, there are bound to be drivers that make use of the interior streets to turn around or go back from where they came. Additionally, one can imagine a minimal degree of pass-through traffic even on something such as a cul-de-sac. As expressed by the Court in *Beutz v. County of Riverside* (2010), “... courts of this state have long recognized that virtually all public improvement projects provide general benefits.”. A conservative estimate of 1.00% for each improvement type would result in the general benefits derived from the street landscaping and tree improvements on local streets to be 2.00% and the special benefit is estimated to be 98.00%.

District-Exclusive Special Benefits

To account for the district-exclusive special benefits received from the improvements (Section 3.2) that are located on exterior streets, twenty percent (20%) of the improvements are excluded from the pass-through calculations.

Improved Aesthetic, Increased Safety, and Economic Activity General Benefit Percentage from Landscaping and Tree Improvements

The general benefit percentages as determined by the method outlined in the sections above have been applied (as applicable) to each street category within the Districts. The area in square feet of landscaping and count of street trees being maintained was determined after review of the City’s geospatial database and the authorized improvements as shown on the original diagrams approved at the formation of each District.

The general benefit percentage for each category of street was multiplied by the total square footage, less twenty percent (20%) for the district-exclusive special benefits, being maintained for such street category. The general benefit square footage was summed for both street categories and divided into the total square footage of all landscaping maintenance. The result is the overall improved aesthetics, increased safety, and economic activity general benefit percentage from landscaping improvements. The same method was followed to calculate the general benefit from the street tree improvements. The improved aesthetics, increased safety, and economic activity general benefit percentages from landscaping and street tree improvements for each District are shown in the table below. For each District’s specific calculation please refer to Section 10.5.

5.2 Benefits from Park Improvements

There are five Districts with park improvements included as an authorized improvement. The Districts include: LMD 32, LMD 39, LMD 46, LMD 51 and LMD 58. As a result of the maintenance and operation of the park improvements, there will be a level of improved aesthetics and economic activity general benefit conferred to people that do not live within the Districts. In order for property within each District to be assessed only for that portion of special benefits received from the District’s park maintenance activities, general benefits provided by the ongoing maintenance of the improvements need to be quantified. The amount of general benefit provided from the District-specific maintenance activities cannot be funded via property owners’ assessments.

There are two types of parks maintained by the Districts: Mini Parks and Neighborhood Parks. Mini Parks (also known as pocket parks) are intended to serve a limited population within a short radius (usually less than one-third of a mile) and Neighborhood Parks are intended to be easily accessible to local residents and designed to serve the surrounding neighborhood.¹⁷ The following lists the District-specific parks being maintained through the assessments.

District	Park	Acreage	Park Classification	Service Radius ¹
LMD 32	Borchard Oak Park	0.5	Mini Park	less than 0.3 miles
LMD 39/LMD 46 ²	Promesa/Sueno Park	4.0	Neighborhood Park	¼ to ½ mile
LMD 51	Pfeiler Park	3.1	Neighborhood Park	¼ to ½ mile
LMD 58	Garden City Acres Park	5.5	Neighborhood Park	¼ to ½ mile

(1) Service radius as defined in the April 2006 Background Report; defined in tables 4-28

(2) Park within LMD 39; per formation Engineer’s Report LMD 46 receives a special benefit from the park and pays a proportional share of the park costs (51.78%).

Neighborhood parks, according to City standards, can range up to 10 acres. The City does not have a standard service radius for parks within the Neighborhood classification, however the National Recreation and Park Association (NRPA) has developed standards that have been traditionally applied. The most recent NRPA service radius for a Neighborhood Park is ¼ to ½ mile.¹⁸ In addition, there is a standard of ½ mile as a reasonable distance to walk to a park.¹⁹ Even though the park facilities were installed for the benefit of the residents within the Districts, and most parcels outside of the boundaries have their own park within close proximity, there will be some general benefit to those people who do not live or conduct business inside the Districts but are within the service radius listed above.

The Summary of Travel Trends, 2009 National Household Travel Survey (NHTS) prepared by the U.S. Department of Transportation Federal Highway Administration analyzed the number of person trips by various modes of transportations such as private vehicle, transit, walking or some other means of transportation. According to the Pacific Division data extracted from the 2009 NHTS database, of the annual 181,703 (in millions) total person trips, 23,399 (in millions) or 12.88% of those person trips were for social/recreational purposes (using all modes of transportation: walking, bicycle, vehicle, et.al.)²⁰.

According to the U.S. Census Bureau (2010-2014), the average household size in the City is 3.98 persons²¹. Based on this average household size, and the number of residential units within each District, the following details the number of people residing within and outside the boundaries of each applicable District with direct access to the park and within the corresponding park service radius.

LMD 32		
.3 Mile Park Population	Estimated Number of Residential Units	Estimated Number of Persons ¹
Within LMD 32	27	108
Outside LMD 32 ²	491	1,954
Total Population within .3 mile and having direct access to park	518	2,062

- (1) U.S. Census Bureau (2010) average household size in the City is 3.98 persons.
- (2) There are additional parcels that are within the .3-mile radius, but without direct access to the LMD 32 park (i.e. would have to cross arterial streets); these parcels have access to parks that are within a closer proximity than the LMD 32 park and are not included in the residential unit count.

LMD 39 and LMD 46		
1/2 Mile Park Population	Estimated Number of Residential Units	Estimated Number of Persons ¹
Within LMD 39	244	971
Within LMD 46	262	1,043
Outside LMD 39/LMD 46 ²	392	1,560
Total Population within ½ mile and having direct access to park	898	3,574

- (1) U.S. Census Bureau (2010) average household size in the City is 3.98 persons.
- (2) There are additional parcels that are within the 1/2-mile radius, but without direct access to the LMD 39/LMD 46 park (i.e. would have to cross arterial streets, railroad tracks); these parcels have access to parks that are within a closer proximity than the LMD 39/LMD 46 park and are not included in the residential unit count.

LMD 51		
1/2 Mile Park Population	Estimated Number of Residential Units	Estimated Number of Persons ¹
Within LMD 51	219	872
Outside LMD 51 ²	1,560	6,209
Total Population within ½ mile and having direct access to park	1,779	7,081

- (1) U.S. Census Bureau (2010) average household size in the City is 3.98 persons.
- (2) There are additional parcels that are within the 1/2-mile radius, but without direct access to the LMD 51 park (i.e. would have to cross arterial streets); these parcels have access to parks that are within a closer proximity than the LMD 51 park and are not included in the residential unit count.

LMD 58		
1/2 Mile Park Population	Estimated Number of Residential Units	Estimated Number of Persons ¹
Within LMD 58	156	621
Outside LMD 58 ²	772	3,073
Total Population within ½ mile and having direct access to park	928	3,694

(1) U.S. Census Bureau (2010) average household size in the City is 3.98 persons.

(2) There are additional parcels that are within the 1/2-mile radius, but without direct access to the LMD 58 park (i.e. would have to cross arterial streets); these parcels have access to parks that are within a closer proximity than the LMD 58 park and are not included in the residential unit count.

In order to determine the estimated total number of persons who are within close proximity (service radius) to each of the park improvements that may utilize the park (for all modes of transportation), the 12.88% of person trips reported from the NHTS Pacific Division study (trips for social/recreational purposes) were multiplied by the total number of persons within the park service radius and having direct access to the park, but outside of the District boundary.

Within Service Radius Outside LMD boundary	Estimated Number of Persons Outside	Estimated Number of Persons using LMD Specific Park
Outside LMD 32	1,954	252
Outside LMD 39/LMD 46	1,560	201
Outside LMD 51	6,209	800
Outside LMD 58	3,073	395

Applying the number of trips for purposes that persons outside the District boundaries may use the parks divided by the total population within the service radius and having direct parks access, the estimated percentage of persons engaging in what is considered general benefit because they do not reside within the District, is shown in the following table:

Within Service Radius Outside LMD boundary	Estimated Number of Persons Outside using LMD specific Park ¹	Total Park Service Area Population	% of General Benefit
Outside LMD 32	252	2,062	12.22%
Outside LMD 39/LMD 46	201	3,574	5.62%
Outside LMD 51	800	7,081	11.30%
Outside LMD 58	395	3,693	10.70%

(1) Estimated number of persons previously determined within park service radius and outside of the District boundary, multiplied by 12.88% social/recreational trips.

LMD 32 – Improved Aesthetics and Economic Activity General Benefit from Park Improvements

Given the location and size of the LMD 32 park, it is very unlikely the public at large, beyond the service radius, would seek out or use the smaller local park especially when the City has larger community and regional parks that are intended to attract people from outside areas, and provide recreational opportunities beyond those supplied by local, neighborhood parks. However, there are people who may

randomly decide to visit the park. Consequently, it is likely that certain members of the public at large may use the smaller parks, and as such, a 1.00% general benefit has been assigned to account for usage by the public at large.

.3 Mile and Direct Access General Benefit	12.22%
Public at Large Benefit Park General Benefit	1.00%
Total LMD 32 Park General Benefit	13.22%

Based on the above calculations, the general benefit portion resulting from the LMD 32 park improvements is estimated to be 13.22% and the special benefit is estimated to be 86.78%.

LMD 39/LMD 46 – Improved Aesthetics and Economic Activity General Benefit from Park Improvements

Given the location and size of the LMD 39/LMD 46 park, it is very unlikely the public at large, beyond the service radius, would seek out or use the neighborhood park especially when the City has larger community and regional parks that are intended to attract people from outside areas, and provide recreational opportunities beyond those supplied by local, neighborhood parks, and other neighborhoods within the City have their own local parks. However, there are people who may randomly decide to visit the park. Consequently, it is likely that certain members of the public at large may use the smaller parks, and as such, a 1.00% general benefit has been assigned to account for usage by the public at large.

½-Mile and Direct Access General Benefit	5.62%
Public at Large Benefit Park General Benefit	1.00%
Total LMD 39/LMD 46 Park General Benefit	6.62%

Based on the above calculations, the general benefit portion resulting from the LMD 39/LMD 46 park improvements is estimated to be 6.62% and the special benefit is estimated to be 93.38%.

LMD 51 – Improved Aesthetics and Economic Activity General Benefit from Park Improvements

Given the location and size of the LMD 51 park, it is very unlikely the public at large, beyond the service radius, would seek out or use the neighborhood park especially when the City has larger community and regional parks that are intended to attract people from outside areas, and provide recreational opportunities beyond those supplied by local, neighborhood parks, and other neighborhoods within the City have their own local parks. However, there are people who may randomly decide to visit the park. Consequently, it is likely that certain members of the public at large may use the smaller parks, and as such, a 1.00% general benefit has been assigned to account for usage by the public at large.

½-Mile and Direct Access General Benefit	11.30%
Public at Large Benefit Park General Benefit	1.00%
Total LMD 51 Park General Benefit	12.30%

Based on the above calculations, the general benefit portion resulting from the LMD 51 park improvements is estimated to be 12.30% and the special benefit is estimated to be 87.70%.

LMD 58 – Improved Aesthetics and Economic Activity General Benefit from Park Improvements

Given the location and size of the LMD 58 park, it is very unlikely the public at large, beyond the service radius, would seek out or use the neighborhood park especially when the City has larger community and regional parks that are intended to attract people from outside areas, and provide recreational opportunities beyond those supplied by local, neighborhood parks, and other neighborhoods within the City have their own local parks. However, there are people who may randomly decide to visit the park, use the open fields for sporting practice, and the City’s mobile activity center does operate sessions at this park location. Consequently, a 5.00% general benefit has been assigned to account for usage by the public at large.

.50 Mile and Direct Access General Benefit	10.70%
Public at Large Benefit Park General Benefit	5.00%
Total LMD 58 Park General Benefit	15.70%

Based on the above calculations, the general benefit portion resulting from the LMD 58 park improvements is estimated to be 15.70% and the special benefit is estimated to be 84.30%. Note, per the formation Engineer’s Report, the LMD 58 special benefit related to the Garden City Acres Park is 26.18%. The 15.70% general benefit calculation shown above is the percentage of general benefit of the originally calculated 26.18% special benefit. The special benefit is estimated to be 84.30% of the 26.18% previously determined special benefit.

5.3 Collective District General Benefit

Since each District is comprised of a blend of improvements, the maintenance activities and general benefit conferred must be addressed in a collective form rather than independently. Therefore, the arithmetic mean of the general benefit percentages has been used to quantify the overall level of general benefit for the District. This general benefit result is provided in the table below:

6. ESTIMATE OF COSTS

The estimated costs of maintenance and servicing the improvements as described in the Plans and Specifications are summarized on the following pages. Each year as part of the assessment district levy calculation process, the costs and expenses are reviewed and the annual costs are projected for the upcoming year.

(1) Service level based on funds available.

(2) Contractor maintenance costs, utilities and incidental costs directly related to the maintenance and replacement of the improvements.

(3) Amounts from bids received.

(4) Costs related to City staff time and expenses directly related to the administration and management of the Districts, including oversight and coordination of City and contractor provided services, annual process of placing assessments on the tax roll and responding to property owner inquiries. Costs allocated based on each Districts Contractor Maintenance Costs in proportion to the entire Contractor Maintenance Costs.

(5) Costs related to indirect City staff time per Cost Allocation Plan.

(6) Third party (non-City staff) costs directly related to the Districts.

(7) Estimated costs related to on call services, contingency, and replacement costs of the improvements.

(8) Special projects for 2021/22.

(9) Please refer to District formation Engineer's Report for details. Per LMD 46 documents, LMD 46 pays 51.78% of the LMD 39 park maintenance costs. Per LMD 58 documents, LMD 58 pays 26.18% of the City Acres Park maintenance costs; please refer to special/general benefit analysis for special benefit portion of the 26.18% attributed to LMD 58. LMD 33 transfer to LMD 34 to cover portion of Kohala St basin maintenance costs.

(10) City contribution related to the general benefit incurred from the improvements.

(11) Surplus Funds available to reduce levy amount.

(12) Actual Levy Amount applied may differ slightly due to rounding adjustment.

(13) Expenses and Revenues may differ slightly due to rounding adjustment.

(14) Actual rates will be rounded down to even cents for "per unit" rates for the County Tax Roll.

(15) LMD No. 43 (Greenbelt) 2021/22 Maximum Rates are as follows: Zone 1- Parc Rose \$1,510.16/acre, Zone 2- Solana II \$347.23/unit, Zone 3- Tiera Vista \$1,455.50/acre, Zone 4- Mayfield \$277.22/unit.

(16) LMD No. 46 (Daily Ranch) 2021/22 Maximum Rates are as follows: Area A- \$826.51/unit, Area B- \$799.62/unit, Area C - \$714.13/unit; please note, the City pays for the maintenance of Area D improvements which have been removed from the LMD.

(1) Per City.

(2) Six-months of estimated maintenance expenses to cover the ongoing costs until the City receives its next apportionment of funds from the County.

(3) Does not include surplus fund credits provided in 2020/21. A review of revenues to actual expenditures should be provided at fiscal year end.

7. METHOD OF ASSESSMENT

Each of the parcels within the Districts are deemed to receive special benefit from the improvements. Each parcel that has a special benefit conferred upon it as a result of the maintenance and operation of improvements are identified and the proportionate special benefit derived by each identified parcel is determined in relationship to the entire costs of the maintenance, operation and servicing of the improvements.

The method of assessment is based upon a formula that assigns the special benefits to each parcel, adjusted by parcel specific characteristics (i.e. units, lot size (acreage)). Generally, two methods of assessment have been used for the Districts. Within each District, benefits are assigned per parcel or per acre. The summaries of these formulas for each District are provided below. For the District specific methodology, reference is made to Section 10.7.

Districts whose formula is set by dividing the net assessable amount by the number of assessable lots or parcels within the District are:

7.1 Cost of Living Inflator

The following lists the cost of living inflation factors for the applicable Districts (as approved at formation of the District). In January 2018, the Bureau of Labor Statistics updated their geographic areas for computing Consumer Price Index. The City declared its intention to use the Los Angeles-Long Beach-Anaheim CPI via Resolution No. 15,126. For District specific information, refer to Section 10.7.

(1) The inflator is the Consumer Price Index – All Urban Consumers (CPI) for the Los Angeles-Long Beach-Anaheim CA region compared year over year as of the month listed in the table and beginning with the year listed in the original Engineer’s Report. For years where the CPI is less than zero the inflation factor is zero.

8. ASSESSMENT DIAGRAMS

The Assessment Diagrams for the District are incorporated by reference in Section 10.7 of this Report. The lines and dimensions of each lot or parcel within the Districts are those lines and dimensions shown on the maps of the County Assessor of the County of Ventura, at the time this report was prepared, and are incorporated by reference herein and made part of this Engineer's Report.

Subject: Re: Traffic Study for General vs. Special Benefit Calculation for FY 16-17 Budget

Hi Tiffany,

For local residential streets with one lane of traffic in each direction operating at Level Of Service C, an acceptable Average Daily Traffic vehicle volume in both directions is 1200.

Thanks,
Jason

Good Morning Jason and Earnel,

I just wanted to follow up regarding the City having an estimated average daily trips by street type/category. Is there a standard the City uses when a traffic study has not been prepared for "local" streets?

Thanks,
