

CITY OF OXNARD

Solid Waste Rate Study

January 24, 2024

THIS PAGE INTENTIONALLY LEFT BLANK

January 12, 2024

Mr. Brian Yanez Assistant Public Works Director City of Oxnard 305 West Third Street Oxnard, CA 93030

Subject: Environmental Resources Cost of Service and Rate Study Report

Dear Mr. Yanez:

Raftelis is pleased to provide this Environmental Resources Rate Study report for the City of Oxnard (City) to address current financial challenges the City is facing and to establish the Environmental Resources Enterprise Fund (ER Fund) solid waste system (System) rates and fees that are equitable and align with Proposition 218. The major objectives of the study include the following:

- Develop a financial plan for the ER Fund to ensure financial sufficiency, meet operation and maintenance costs, provide funding for capital replacement and renewal (R&R) needs, and improve the financial health of the enterprise;
- Review the current rate structure for the ER Fund and propose recommended changes based on the cost of service; and
- Perform a cost allocation and prepare a recommended five-year schedule of rates and fees for the ER Fund.

The report summarizes the key findings and recommendations related to the development of the financial plans for the solid waste enterprise and the development of the updated solid waste (refuse) Enterprise Fund rates and fees.

It has been a pleasure working with you and we thank you and the City staff for the support provided during the course of this study.

Sincerely,

Thierry A. Boveri, CGFM Vice President

Sarah Neely Consultant

1. Executive Summary

1.1. Background

The City of Oxnard (City) contracted with Raftelis Financial Consultants (Raftelis) to conduct an Environmental Resources Rate Study (Study) comprising a ten-year financial forecast, a cost-of-service analysis, and a proposed five-year schedule of rates and fees¹ for the Solid Waste System (System) of the Environmental Resources Department (Department). The Department is established as an Environmental Resources Enterprise Fund (ER Fund) meaning that the rates and fees for service must cover the cost of the service. This Study presents the financial plans, the cost-of-service analysis, and the proposed rates and fees for the Environmental Resources Enterprise Fund.

This Executive Summary provides a detailed overview of the rate study process, financial plan, proposed rates and bill impacts, and a monthly residential bill comparison. Through this Rate Study the City desires to establish fair and equitable rates that:

- Fund the projected fiscal requirements of the ER Fund in terms of operation and maintenance costs, capital replacement and refurbishment (R&R) in order to maintain operations, cash reserve (Reserves) levels, and improve the financial health of the enterprise; and
- Recommend a proposed five-year schedule of solid waste rates that meet the statutory requirements set forth in Proposition 218.

The City's Department provides solid waste collection service to a population of over 201,000 customers in the City through approximately 34,480 residential customers and 5,082 commercial customers and apartment buildings. On an annual basis, the Department's customers generate over 295,000² tons of municipal solid waste. In addition, the Department processes approximately 24,900 tons of comingled recyclables and 22,000 tons of organic materials (green waste and food waste) at the Del Norte Regional Recycling and Transfer Station (Del Norte Facility). The Del Norte Facility includes a scale house to weigh materials, a tipping floor to unload materials, a transfer facility for outbound materials, and a materials recovery facility (MRF) to process recyclables. The Del Norte Facility also accepts certain household hazardous waste, bulky materials, and other household wastes. The combined waste/recycle tonnages managed by ER's collections amounts to approximately 317,100 tons annually as later presented in Table 29 within section 3 of this report. To dispose of outbound materials, the City has agreements with Waste Management for the disposal of solid waste at the Simi Valley Landfill, and with Agromin for the processing of organic materials.

1.2. Process

Raftelis developed a financial plan for the ER Fund which sets forth the total revenue adjustments needed to meet capital investments, operational expenses, debt service obligations, and increasing Reserve levels during the five-year rate-setting period. Raftelis worked with City staff to confirm key assumptions relied upon in the

¹ Reference is made to the City's rates and fees throughout this document to provide a distinction whereby "rates" refers to charges which are subject to Proposition 218 requirements while "fees" refers to optional services that are <u>not</u> subject to the Proposition 218 requirements.

² Represents the annual amount of material collected and landfilled by the Department and includes residuals from processing of recyclables, bulky items, and other wastes.

determination of the Study recommendations, including the analysis of the adequacy of the operational requirements and corresponding costs to meet the level of service requirements of the System. This work effort resulted in the development of preliminary financial plan options for consideration by the City Council as presented at the December 5, 2023 council meeting. After presenting the financial plans, and receiving direction from City Council, Raftelis performed the cost-of-service analysis to determine the System rates and fees based on the selected financial plan.

Raftelis also assisted the City in presenting the rate and fee setting processes at community meetings in November and December 2023, as well as in January 2024. These events were conducted to inform customers about the levels of service the City provides, the need for Revenue Adjustment and associated fees (Revenue Adjustments) in order to continue providing these services, and the Proposition 218 legal requirements. During the preparation of the cost of service analysis the work effort identified bill impacts above those estimates presented to City Council and the public at the first community meeting. Based on direction from City staff and consistent with City Council comments at the December 5th, 2023 City Council meeting, the financial plan was adjusted to reduce the additional bill impacts to maintain consistency with what had been presented to City Council for the standard residential three (3) cart service. The key adjustments made to the financial plan to accomplish this goal included: i) extending out in future fiscal years some of the capital spending for facilities; ii) reducing discretionary future operating expense escalations; and iii) targeting compliance with the City's current Reserve policy target over a longer period of time. Even though three key adjustments as stated above were made to the financial plan, the core objective of the plan to provide additional resources for fleet replacement and renew key facilities is still achieved.

1.3. Proposed ER Fund Financial Plan

Raftelis conducted a status quo scenario analysis to evaluate whether existing ER Fund rates and fees could adequately fund the City's solid waste operations over the ten-year forecast period (Rate Study Period). This analysis projected annual revenues, operation and maintenance expenses, debt service payments, capital expenditures, and Reserve requirements through the Fiscal Year 2032. Based on the key assumptions of the analysis, Raftelis determined that the existing rates for solid waste services will not be adequate to generate sufficient revenues to maintain operation levels and fund the projected needs of ER Fund Services.

After the status quo analysis was complete, Raftelis prepared different Revenue Adjustment scenarios, which were presented to the City Council. The City Council selected scenario 3, which fully funds the projected revenue requirements with greater near-term rate adjustments, but lower overall increases over the five year rate adjustment period relative to Scenario 4, which represented the phase-in option with the same funding requirements.

Table 1 shows the proposed Revenue Adjustments based on the financial plan selected by the City Council, for the initial five years of the Rate Study Period. To ensure that the residential 3 cart bill impacts were generally consistent with what had been presented to City Council on December 5th, 2023, and consistent with Council's comments and decisions, the overall Revenue Adjustment were lowered. Implementation for the proposed rate adjustments were assumed at the outset of each fiscal year, starting on July 1, 2024. It is recommended that the need for any future identified Revenue Adjustment be reviewed in the Fiscal Year 2028 or earlier in the event of a significant change in conditions during the recommendation period which would necessitate a change in rate revenues (i.e., changes in customer demands, regulations, cost of contracted disposal, etc.).

Effective Date	Preliminary Plan (Scenario 3)	Adjusted & Recommended Plan
July 1, 2024	50.00%	33.00%
July 1, 2025	8.00%	10.00%
July 1, 2026	5.50%	5.25%
July 1, 2027	5.00%	3.00%
July 1, 2028	3.00%	2.84%

Table 1: Proposed ER Fund Rate Revenue and Associated Fee Adjustments

Key factors influencing the need for proposed revenue adjustments include:

- City Council last approved a cost-of-service analysis in May 2012, resulting in rate adjustments effective January 2013. The authorized rate adjustments to the City's ER Fund rates represent a cumulative 2.1% increase to residential rates and a 2.7% increase to commercial rates since 2012. In contrast, the Consumer Price Index (CPI) has increased 33.9% over the same period since 2013 through 2023.
- The City is subject to current and future unfunded local, state, and federal mandates regarding solid waste handling, including several recycling and composting laws that are already in effect and had major financial and operational impacts on the System and the ER Fund. For additional information reference section 3.2.
- As shown in Figure 1, the status quo scenario analysis indicates an initial funding deficiency within the initial Fiscal Year 2025 that accounts for approximately 2/3 of the overall need to increase rate revenues through the Fiscal Year 2029.
- Planned implementation of an Infrastructure Use Fee, which will amount to approximately \$2 million annually and may begin in Fiscal Year 2025.

Addressing the funding deficiency and inflation will provide adequate funding for operations, capital funding, and support deposits to Reserves by the end of the initial five years of the Rate Study Period to help maintain compliance minimum Reserve targets.

(Remainder of Page Intentionally Left Blank)

Figure 1 provides a breakdown of the projected revenue requirements of the System. As can be seen from the gap analysis, the ER Fund's current period expenditures (stacked bar) exceeds existing revenues (solid green line), which only grows over time due to elevated inflation in the cost of operations, additional expenses to address unfunded State mandates, need for significant capital investments, and replacement of aging capital.

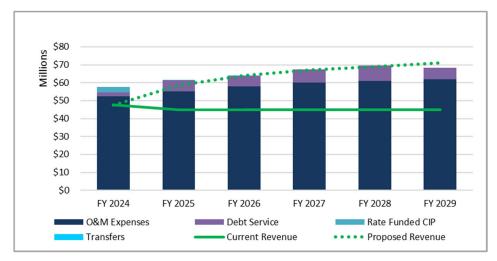

Figure 1: Proposed ER Fund Financial Plan

Figure 2 shows projected operating and capital ending balances over the initial five year of the Rate Study Period relative to the City's total Reserve targets under the proposed financial plan selected by Council. Assuming implementation of the recommended rate adjustments, the City is projected to achieve 50% of the targeted minimum Reserve target and is projected to rebuild towards the Council policy such Reserves in the final year of the Rate Study Period.

Figure 2: Proposed ER Fund Financial Plan: Cash Reserves

Figure 3 shows the proposed capital financing plan over the initial five years of the Rate Study Period. The Study assumes that capital is funded primarily through short term capital leases and debt. The capital improvement plan is composed of facility investments, followed by fleet-related expenses and equipment purchases.

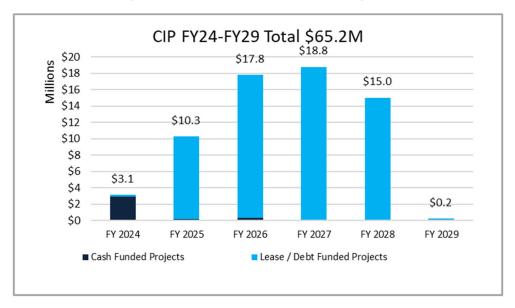

Figure 3: ER Fund Capital Financing Plan

1.4. Proposed ER Fund Rates and Fees

The proposed five-year ER Fund rate schedule was developed based on the cost-of-service allocation and rate structure as discussed in greater detail in Section 5. The proposed rate and fee structure revises the current rate structure and incorporates new service level offerings including:

- 1. Combining single family and multifamily 3-cart curbside service into a single class of service recognizing that the service is the same for both classes. The City offers two (2) refuse service levels at 64 gallon and 96 gallon to meet the needs of smaller and larger household sizes;
- 2. Creation of a mobile home class of service and rate for 3-cart service that mirrors the standard residential 3-cart rate structure which has been reduced by approximately 8% to reflect the exclusion of IUF payments; which is not applicable to mobile home parks;
- 3. Addition of new commercial bin / container size service offerings of 1 cubic yard through 4 cubic yard organic bin collection and disposal service;
- 4. Separation of the commercial rate structure for recycling and green waste. While the City has very few commercial green waste bin service customers, the collection costs for recycling and green waste are equivalent, however, due to differences in the disposal costs separation of the rate structure for these services is warranted;

- 5. Simplifying the commercial and industrial rate structure for roll-off service, by charging a single "pull rate" for all customers regardless of bin size. In conjunction with this rate structure change an additional bin rental fee is recommended and this fee will vary based on the size and cost of the bin. Disposal costs will continue to be based on actual weight of material disposed of at the applicable tip fees proposed in the revised rate structure. This rate structure would also apply to and replace the City's current commercial bin rental service fee structure for roll-off service where bins exceed 4 cubic yards; and
- 6. Addition of new tip fees at the Del Norte facility for single stream recyclables and organics. The recycling tip fee is only applicable to customers who do not currently pay a monthly collection rate for collection service within the City.

Bulky Pick-up (up to 5 items) ¹	\$35.00	\$45.00	\$46.35	\$47.74	\$49.17	\$50.65

1 Please note that for Residential 3 cart service (including Mobile Homes) customers receive 1 bulky items pickup (up to 5 items) per year at no additional charge as noted in Tables 2 and 3.

(Remainder of page intentionally left blank)

1.5. Proposed ER Fund Rate Bill Impacts

The proposed five-year ER Fund rate schedule was developed based on the cost-of-service allocation and rate structure as discussed in greater detail within Section 5. The following presents a bill impact comparison for the most common services offered by the City.

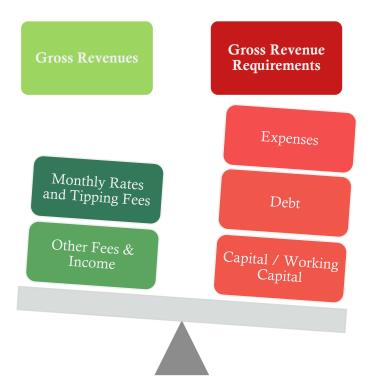

Table 16: Proposed Five-Year Schedule of Residential and Commercial Rate Impacts

Fiscal Year >		FY2025	FY2026	FY2027	FY2028	FY2029
Effective Date >	Current	7/1/2024	7/1/2025	7/1/2026	7/1/2027	7/1/2028

2. Methodology

The foundation of this Study and the primary objective of the ER Fund rates and fees are to reasonably recover the cost of providing service including the cost of infrastructure, equipment investment, and compliance with recommended fiscal targets, which is referred to as a Revenue Sufficiency Evaluation.

Ensuring adequate cash reserves and appropriate cash flows generally results in a sustainable long-term financial plan that can mitigate the financial and operating risk(s) from unanticipated or sudden events to financial operations (e.g., changes in market conditions affecting operations and recovered materials revenues, reduced growth or tonnages, unanticipated or extraordinary expenses, unfunded mandates, etc.). The identified revenue requirements to be funded from rates are then allocated based on the type and level of service.

In order to assess the sustainability of the City's rates for service, Raftelis developed a financial model capable of forecasting ER Fund operations over a ten-year Rate Study Period, which is necessary to assess the sustainability needs of the ER Fund for the proposed rate revenue and associated fee adjustment period for Fiscal Years 2025 through 2029. By forecasting operations over the ten-year Rate Study Period, the Study is able to capture non-annually recurring lifecycle costs such as vehicle and capital asset replacement, test sensitivity to potential changes in operations or costs, and examine projections of Reserves and net revenue margins to evaluate compliance with fiscal policies. Performing a thorough evaluation of the City's funding requirements provides the ability to offer sound rate recommendations to help ensure the City has sufficient resources to fund operations and achieve their objectives.

The following provides a brief overview of the key activities performed for the Study:

- 1. An evaluation of the service area requirements for the City was performed. This included a review of recent historical customers served and corresponding waste generation such that: i) a representative forecast of the ER Fund's needs from a financial standpoint could be prepared; and ii) a projection of rate revenues consistent with the projected service area needs could be developed.
- 2. Raftelis, with support of City staff, developed a projection of the System's "net revenue requirements" which is comprised of the components summarized below. The first five components are expenditure requirements of the system and are funded from monthly user rates
 - + Cost of Operation and Maintenance
 - + Debt Service (Vehicle Leases & Facility Debt)
 - + Indirect Cost Allocation and Administration Payments (Infrastructure Use Fees)
 - + Capital Funding Requirements
 - + Deposits to Reserves for Policy Compliance and Future Expenditures
 - Other Operating Revenue
 - Interest Income / Transfers from Operating Reserves
 - = Net Revenue Requirements (Funded from Rates)
- 3. The net revenue requirements were then allocated by function and service to the various customer and service classes as later described in Section 5. The customer billing statistical data was then adjusted to represent a common unit of measure referred herein and throughout the report as the Equivalent Billing Unit (EBU). The collection system EBUs are denominated in the number of gallons of capacity per the customer's cart or bin size times the annual number of pickups. The disposal system EBUs are denominated in the tonnage for the system. The allocated net revenue requirements were then divided by the EBUs to calculate the unit cost of collection and disposal services.
- 4. To determine the recommended rate, the calculated unit costs are factored based on the type and level of service. For example, to determine the residential monthly 3 cart service rates for 96 gallon service, the calculated unit costs for refuse / municipal solid waste collection, recycling, and organics were applied to the level of service parameters of once a week collection times the average number of weeks in a month times the number of gallons in the bin (i.e., unit cost x weekly collection frequency x average number of weeks in a month x the quantity of gallons of the cart).

3. Key Inputs and Assumptions

Raftelis developed an ER Fund financial projection and rate calculation for a ten year period, which serves as the basis for the Rate Study Period as previously described. The City's fiscal year spans from July 1 through June 30. Projections in future years were generally based on the budgeted Fiscal Year 2024 data using key assumptions outlined within Section 3 of this report. Assumptions generally include, but are not limited to, projections of growth and tonnage demands, expenditures as contained in the City's budget, assumed changes in operations such as the addition of staffing, capital funding requirements, or other expectations of future cashflow projections. All assumptions were discussed with and reviewed by City staff. This section will detail all the key assumptions developed in support of the financial plan.

3.1. Key Inputs: Current Rates and Operations

The current ER Fund rates and fees for service were adopted pursuant to Ordinance No. 2861, which included a two-year schedule of rates with the current rates effective as of October 18 2012, and January 1, 2013. City Council last approved a cost-of-service analysis in May 2012, resulting in rate adjustments effective January 2013. The authorized rate adjustments to the City's ER Fund rates represent a cumulative 2.1% increase to residential rates and a 2.7% increase to commercial rates. In contrast, the Consumer Price Index (CPI) has increased 33.9% over the same period.

As it relates to residential solid waste collection service, the City provides residents with weekly collection service utilizing a three-bin (or three-stream) system for their combined garbage, recycling, and organic waste. The monthly rate for residents includes one (1) cart for each of their household waste (garbage, recycling, and organic waste). Any additional carts are available for an additional fee. Table 17 shows the current adopted residential rates and fee schedule for single family residential service developed during the prior rate study.

Residential Collection Rates and Fees	Current		
Initial 96-Gallon Cart Rate ⁽¹⁾	\$30.78		
Initial 64-Gallon Cart Rate ⁽¹⁾	\$24.70		
Extra Container Rate per Month	\$11.36		
Extra Pickup Fee	\$11.74		
Bulky Pickup Fee (up to 5 items) ⁽²⁾	\$35.00		
 (1) Charge for service includes garbage, recycling, organics collection every week. (2) Up to 5 items are included in the fee, however the City will collect up to 10 items for an additional charge. City staff recommends bin rental corrige for mean them 10 items. 			

Table 17: Current Residential Single Family ER Fund Rate Structure

service for more than 10 items.

The City also offers cart service to attached multi-family residential units 4 or less. This can include mobile homes, town homes, duplexes, triplexes, and quadraplexes. Table 18 shows the current adopted residential rate schedule developed during the prior rate study.

Residential Collection Rates	Current	
First Unit	\$30.78	
Second Unit	\$27.73	
Third Unit	\$26.22	
Fourth Unit and Above	\$24.70	
(1) Charge for service includes garbage, recycling, organics collection every week.		

Table 18: Current Multi-Family (<4 Units) Residential ER Fund Rate Structure

Along with residential cart collection service, the City provides curbside cart collection service to its nonresidential and commercial customers which varies in the level of service based on demand. The City also offers bin collection service to the non-residential and multi-family greater than four units (>4) receiving commercial-like bin service. Table 19 and Table 20 show the current adopted monthly rates for such service.

Table 19: Current Non-Residential ER Fund Rate Structure

Non-Residential & Commercial Cart Collection Rates	2024
Non-Residential & Commercial Cart	
Collection Rates – Refuse Only	
One 96-Gallon Cart	\$43.53

3.2. Key Assumptions: Regulations

The following section provides a summary overview of the legal and regulatory environment for solid waste management in the City. The summary is based on review of relevant State laws and regulations. This review should not be considered exhaustive and therefore should not be relied upon for any other purpose than the purposes of this Study to help provide relevant context concerning the level of service and operational requirements of the System. This section is not intended to represent or provide any legal opinions or interpretations on State law.

- **AB 341** Mandatory Commercial Recycling (MCR) Adopted into California Law in 2012 and requires businesses that generate four or more cubic yards of commercial waste per week and multi-family complexes with five or more units to self-haul or subscribe to recycling services.
- **AB 1826** Mandatory Commercial Organics (MORe) Effective January 1, 2016, and phases in the number of businesses and multi-family dwellings that are required to subscribe to commercial organic collection service.
- **AB 827** Effective July 1, 2020, and expands upon requirements of MCR and MORe to include mandatory recycling and organics carts for businesses at the "front of house" (i.e. portion of the business open to the public) to collect waste generated by customers from products they purchase and consume on the premises.
- **SB 1383** Short-Lived Climate Pollutants (Organics Recycling) Effective January 1, 2022, and requires jurisdictions to provide organic waste collection services to all residents and businesses so that they may divert all organic waste to a compost program.
- Applicable California Air Resources Board (CARB) Regulations³: The Advanced Clean Fleets (ACF) regulation is part of CARB's overall approach to accelerate a large-scale transition to zero-emission medium- and heavy-duty vehicles. These requirements are pursuant to the Governor's executive order N-79-20.
 - Advanced Clean Fleets (ACF) regulation applies to local government fleets with common ownership of more than 50 vehicles, which is applicable to the City of Oxnard. The regulation requires State and local government fleets, including city, county, special district, and State agency fleets, to ensure specified percentages of vehicle purchases and/or fleet totals are zero-emission beginning as early as 2024, or otherwise face penalties.

3.3. Key Assumptions: Customer Statistics

3.3.1. Customer Accounts

The forecast of solid waste service revenues relied upon a review of recent historical trends in solid waste customer account growth and tonnage statistics. Based on the California Department of Finance (DOF) population projections, no growth to either residential or commercial service was assumed for the forecast. The following tables provide a summary of the solid waste customer billing statistics:

³ <u>https://ww2.arb.ca.gov/resources/fact-sheets/advanced-clean-fleets-regulation-summary</u>

3.3.2. Waste Generation

With respect to waste generation, the City currently collects approximately 317,100 tons of waste per year. The majority of tonnages can be attributed to the commercial and industrial customer classes. The City is responsible in working to achieve the required solid waste diversion goals set by the State of California, including compliance with organics diversion requirements from S.B. 1383 and A.B. 1826. The table shown below summarizes the City's tonnage reports by type of waste.

Description	2024	2025	2026	2027	2028
Refuse	2024	244,639	244,639	244,639	244,639

Table 29: Projected Waste Generation (units in Tons)

* City direct hauls waste from New Indy to the Simi Landfill. Such tons are not directly processed through the City's Del Norte facility.

3.4. Key Assumptions: Revenues

The projected revenues for the System are based on the assumed customer demands of the System as applied to the current rates and fees. Approximately 90% of ER Fund Service revenues are derived from Rate Revenue. To validate the customer billing statistics relied upon in the calculation of the rates and fess of the System, Raftelis compared the product of the customer billing statistics and current rates to the audited and unaudited revenues of the System. Based on a comparison of the City's calculated revenues (i.e., revenue calculated based on the product of customer billing statistics to rates and fees) to reported revenues revealed the amounts were within an approximate 1% variance and therefore no adjustments were reflected to the rate revenues in determination of the revenue sufficiency of the existing rates for service.

The rate revenue projections shown below assume that the current Fiscal Year 2024 rates as presented in section 3.1 are effective throughout the Rate Study Period and, therefore, represent estimated revenues in the absence of any rate increase. Table 30 through 35 presents the revenues under the current rates for ER Fund Services.

Table 30: Projected Cart Collection Revenues Under Current Rates

Existing Revenues	2024	2025	2026	2027	2028	2029

3.4.1. Other Revenues

Other ER Fund Service revenues include miscellaneous revenues, MRF recycle material sales, and investment income. The revenue from MRF recycle material sales is held constant throughout the forecast. Investment income was calculated by taking 1.25% of the average of the beginning and ending cash balances. As mentioned previously these other revenues equate to approximately 10% of gross revenues throughout the Rate Study Period.

Description 2024 2025 2026 2027 2028 2029 \$177,441 ER Security and Contamination Prevention \$177,441 \$177,441 \$177,441 \$177,441 \$177,441 MRF Recycle Material Sale \$2,778,510 \$2,778,510 \$2,778,510 \$2,778,510 \$2,778,510 \$2,778,510 Rental Charges / Day Industrial \$86,529 \$90,909 \$93,182 \$95,512 \$83,603 \$88,692 Del Norte Host Fee \$27,718 \$28,688 \$29,405 \$30,140 \$30,894 \$31,666 Construction & Demolition Debris Fee \$172,971 \$179,025 \$183,501 \$188,089 \$192,791 \$197,611 Mattress Recycling \$50,000 \$51,750 \$53,044 \$54,370 \$55,729 \$57,122 Residential Split Container Fee \$4,934 \$5,107 \$5,235 \$5,366 \$5,500 \$5,638 Residential Green Waste Container Fee \$6,324 \$6,545 \$6,709 \$6,877 \$7,049 \$7,225 Residential Split Container Truck Fee \$5,746 \$5,284 \$5,469 \$5,606 \$5,890 \$6,037 Residential Green Waste Truck Fee \$11,582 \$11,987 \$12,287 \$12,594 \$12,909 \$13,232 Commercial Front End Loader Truck Fee \$9,401 \$9,730 \$9,973 \$10,222 \$10,478 \$10,740 Investment Income \$176,021 \$94,378 \$75,148 \$72,644 \$67,976 \$75,402 **IUF** Reimbursements \$2,614,128 \$0 \$0 \$0 \$0 \$0 Late Payment / Penalties Allowance \$249,982 \$250,000 \$249,982 \$249,982 \$249,982 \$249,982 Total 6,367,917 3,685,141 3,675,533 3,682,891 3,688,332 3,706,119

Table 36: Projected Miscellaneous Under Current Rates

3.5. Expenditures

The expenditures during the Rate Study Period are primarily comprised of (1) operation and maintenance (operating) expenses; and (2) capital outlays.

3.5.1. Assumptions: Operating Expenses

The forecast of operating expenses was developed based upon: i) a review of the recent trends in historical expenses; ii) the Fiscal Year 2024 budget, iii) assumed growth rates and escalation factors to account for inflation in the costs of operation; and iv) discussions with the City staff. Figure 4 shown below presents an overview of the operating expense projections by cost center.

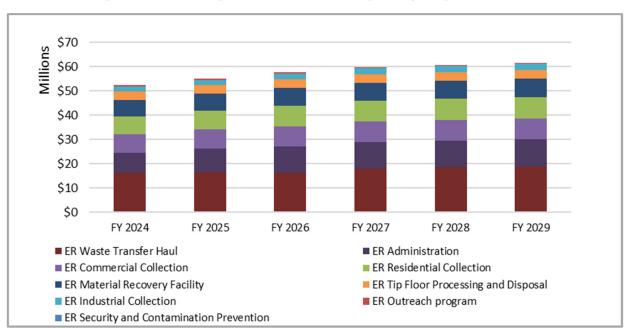

Figure 4: Operating Expense Forecast by Budgetary Cost Center

The ER Waste Transfer Haul cost center is the largest cost center for the System and is primarily comprised of disposal, supplementary waste hauling contracts, and personnel costs. Table 37 shown below presents a forecast of the operating expenses for the System by major category of expense. Overall, the single greatest expense is personnel, which has a growth rate of 2.9% per year. The assumed reduction in contractual operations during the Fiscal Year 2026 is related to the elimination of contracted waste hauling service due to the planned addition of two new collection routes. The forecast assumes incremental operating costs to account for the additional labor, fuel, maintenance, and vehicle purchases.

Description	2024	2025	2026	2027	2028	2029	Growth
Personnel Expenses	\$23,847,782	\$24,563,218	\$25,937,342	\$26,694,291	\$26,694,291	\$26,694,291	2.9%

Total	\$52,497,831	\$55,266,954	\$57,860,786	\$60,084,101	\$60,950,272	\$61,843,001	4.2%

Table 37: Operating Expense Summary

Disposal costs represent the next largest funding requirement accounting for 18% of the total operating expenditures of the System. The disposal fees are calculated for the System through the waste tonnage reports

and tipping fees charged by Simi Landfill. Tipping fees increased by 5.06% from Fiscal Year 2022 and Fiscal Year 2023, and it is assumed that these tipping fees will increase by a more modest 3% rate throughout the Rate Study Period. Table 38 details the calculation of the disposal costs for the Rate Study Period.

Table 38: Projected Disposal Costs

Description	2024	2025	2026	2027	2028	2029
Refuse Disposal Costs - Simi Landfill						
Cost per Ton	\$33.62	\$34.63	\$35.67	\$36.74	\$37.84	\$38.98
Refuse Tons	294,938	294,938	294,938	294,938	294,938	294,938
Calculated Costs	\$9,915,672	\$10,213,703	\$10,520,438	\$10,836,022	\$11,160,454	\$11,496,683
Organics and Other Disposal Costs	\$347,049	\$357,480	\$368,215	\$379,261	\$390,616	\$402,384
Total	\$10,262,720	\$10,571,183	\$10,888,654	\$11,215,283	\$11,551,070	\$11,899,067

Together, the disposal costs and personnel expenses account for approximately \$37.4 million or 64% of total operating expenses. The balance of operating expenses is for maintenance, repayment of indirect services, and other expenses.

As shown in Table 37, pursuant to the discussions with City staff, an annual transfer of approximately \$2 million to the General Fund is assumed to reinstate the Infrastructure Use Fees (IUF) beginning midyear in the Fiscal Year 2025.

In aggregate, the total operating expenses for Solid Waste Services are estimated to increase by 4.2% annually. For additional details concerning the projection of operating expenses please reference Appendix B at the end of this Study.

3.5.2. Assumptions: Escalation Factors

The operating expenses as presented in section 3.5.1 relied upon the application of inflation factors to the Fiscal Year 2024 operating expense budget and are presented in the following table. To ensure that future costs are reasonably projected, Raftelis worked with City staff to confirm the inflation escalation assumptions below.

			iptiono		
Description	2025	2026	2027	2028	2029
Inflation - General	3.50%	2.50%	2.50%	2.50%	2.50%
Salary/Benefits	3.00%	3.00%	0.00%	0.00%	0.00%

Indirect Costs	3.50%	2.50%	2.50%	2.50%	2.50%
Customer Growth	0.00%	0.00%	0.00%	0.00%	0.00%

Table 39: Inflationary Assumptions

3.5.3. Assumptions: Capital Expenditures

The City has developed a comprehensive Capital Improvement Plan (CIP) over the course of the Rate Study Period. Over the next five (5) years (Fiscal Year 2024 – Fiscal Year 2029) the City has allocated \$65.2 million into capital funding. The following table presents a summary of the planned annual capital spending over the Rate Study Period, which is expected to average approximately \$10.9 million annually. The capital needs are primarily related to the need to replace the materials recovery facility (MRF) and MRF equipment that has reached the end of its useful life. Overall, the replacement facilities and facility improvements including equipment accounts for 72% of total capital expenditures between Fiscal Year 2024 – Fiscal Year 2029.

Fleet comprises the remaining 28% of the total CIP expenditure, and the City has planned to purchase additional vehicles to address planned level of service needs. Raftelis worked with City staff to develop a fleet replacement plan generally assuming 8- year service life for residential automatic side loaders, commercial front loaders, commercial roll-offs, commercial transfer trucks, and commercial rear end loaders. Based on discussions with City staff, to meet service demands placed upon the City (explained in Section 3.2), level of service goals, additional fleet vehicles and routes were assumed by the Fiscal Year 2026.

The Solid Waste Services vehicle fleet is subject to the new Advanced Clean Fleets regulations. The Advanced Clean Fleets (ACF) regulation is part of CARB's overall approach to accelerate a large-scale transition to zeroemission medium- and heavy-duty vehicles. These requirements are pursuant to the Governor's executive order N-79-20. This applies to local government fleets with common ownership of more than 50 vehicles and requires State and local government fleets, including city, county, special district, and State agency fleets, are required to ensure 50 percent of vehicle purchases are zero-emission beginning in 2025 and 100 percent of vehicle purchases are zero-emission beginning in 2025 and 100 percent of vehicle ensure the Rate Study Period, the City will not be required to purchase electric vehicles until Fiscal Year 2029. The City is also planning to use the ZEV Milestone Option for regulatory compliance which allows for the phased purchase of zero emission vehicles as presented below.

Table 40: ZEV Milestone Options

Percentage of vehicles that must be zero-emission	10%	25%	50%	75%	100%
Milestone Group 1: Box trucks, vans, buses with two axles, yard tractors, light-duty package delivery vehicles	2025	2028	2031	2033	2035 and beyond
Milestone Group 2: Work trucks, day cab tractors, buses with three axles	2027	2030	2033	2036	2039 and beyond
Milestone Group 3: Sleeper cab tractors and specialty vehicles	2030	2033	2036	2039	2042 and beyond

3.5.4. Existing and Proposed Debt Service

The solid waste fund currently pays capital leases from 2018 and 2021. This expense is currently about \$2 million per year and is anticipated to decrease to about \$1,990,394 in Fiscal Year 2028 and then \$0 per year by the end of the Rate Study Period. The Study assumes additional debt funding to finance the capital improvement plan. Debt funding is assumed for the MRF replacement facility and the replacement equipment. Capital leases are assumed for new vehicles in the forecast.

Description	2024	2025	2026	2027	2028	2029

Table 42: Existing and Proposed Debt Service

Pursuant to discussions with City staff, the Department is not expected to issue debt prior to the Fiscal Year 2026. City staff anticipates renting vehicles until the Fiscal Year 2026.

Table 43 details the adjusted capital lease payments assuming garbage vehicles are rented on a long term basis.

Description	2024	2025	2026	2027	2028	2029
Existing Debt						
Capital Lease – 2021	\$1,537,189	\$1,537,188	\$1,537,188	\$1,537,188	\$1,537,189	0
Capital Lease – 2018	\$584,075	\$584,075	\$584,075	\$584,075	\$584,075	0
Proposed Debt						
Debt Service Payment	\$0	\$0	\$795,396	\$2,330,186	\$3,558,018	\$3,558,018
Proposed Capital Lease						
Calculate Payments	\$31,495	\$1,678,837	\$2,953,537	\$2,959,126	\$2,961,230	\$3,000,998

Table 43: Capital Lease Payment Adjustments

3.5.5. Minimum Cash Reserve Targets

Industry best practices recognize the need and benefit of maintaining minimum Reserves to provide necessary liquidity to fund day to day operations, provide resources to appropriate funds for expected capital outlays, and provide a reasonable allowance for unexpected needs. Pursuant to discussions with City staff the Study assumed the City's currently adopted Reserve policy pursuant to Resolution No.#15718:

Operating Fund Reserve Target: the City Council will endeavor to maintain operating reserves equal to 25% of the operating budget reserve. This would be equivalent to 90 days of operating expenses, which was assumed to provide adequate liquidity for day-to-day operations and provide a reasonable allowance for unexpected costs.

Table 44 presents the forecast of minimum Reserve targets assumed for the Study.

Table 44: Operating Reserve Target

Description	2024	2025	2026	2027	2028	2029
Operating Reserves Target	\$12,944,671	\$13,627,468	\$14,267,043	\$14,815,258	\$15,028,834	\$15,248,959

As previously noted, based on direction from City staff, it was acceptable for Reserves to fall below the target noted in the City's policy in order to help mitigate rate adjustments to customers so long as the Reserves were rebuilding within the final years of the forecast. City Council was informed of this and agreed when making its recommendation at the December 5, 2023 meeting.

4. Solid Waste Financial Plan

This section combines the assumptions previously discussed in the Study to determine the overall revenue adjustments and total amount of revenue required from rates. The revenue covers operating and maintenance (O&M), debt service, and capital expenses as well as Reserve funding. Revenue adjustments represent the average rate increase for the City as a whole; rate changes for individual customers will depend on the cost-of-service analysis described in the following chapter.

Financial plan assumptions previously discussed in Section 3 were reviewed in detail by City staff. To develop the financial plan, Raftelis projected annual expenses and revenues, modeled Reserves, and planned capital expenditures. The City is anticipating financing the capital improvements through capital leases and debt. It is important to note that the most recently audited financial statements reported a \$4 million net revenue loss for Fiscal Year 2022, and that the Fiscal Year 2024 adopted budget assumed net revenue losses. Due to the deficit in the ER Fund and need for significant rate increases, the Study contemplated four scenarios and two sensitivities ranging in capital expenditures and revenue adjustments. Per direction from City Council on December 5th, 2023, the Department was to further explore "Scenario 3 Rate Adjustments with Full Capital Expenditures" as detailed in the following section.

4.1. Rate Adjustments and Full Capital Expenditures

This scenario assumes all funding requirements including operating, capital, and proposed capital lease and debt payments. The key assumptions include:

- Fiscal Year 2023/2024 Served as the baseline for the Rate Study Period as adjusted for actual operating results and known cost increases;
 - \circ $\,$ The operating expense growth is estimated at 4.2% per year;
- Assumes some additional collection routes to maintain regulatory compliance with AB1826, AB827, SB1383 and regular service demands;
- Assumes Infrastructure Use Fee (IUF) repayments from the City to ER ends in Fiscal Year 2024;
- Assumes resumption of IUF payments in Fiscal Year 2025 to the City;
- \$40.7M reinvestment to MRF including new equipment and roof Fiscal Year 2026 Fiscal Year 2028
- Replacement of vehicles at end of life in Fiscal Year 2024/2025
- Compliance with CARB Zero Emissions Vehicle Requirements
- Primarily relies on use of capital leases and debt to fully fund capital expenditures

The following chart presents a forecast of the funding requirements assuming additional revenue adjustments. The debt assumptions observed to fully fund the CIP assume: i) \$43.9 million in 20-year loans at 5.1% interest for the facility capital improvements; and ii) approximately \$18.5 million in capital leases through the Fiscal Year 2029 with a 7-year repayment at 3.3% interest. Total debt and capital lease payments are expected to increase from approximately \$2 million a year to \$8.5 million a year at its highest level by the Fiscal Year 2028.

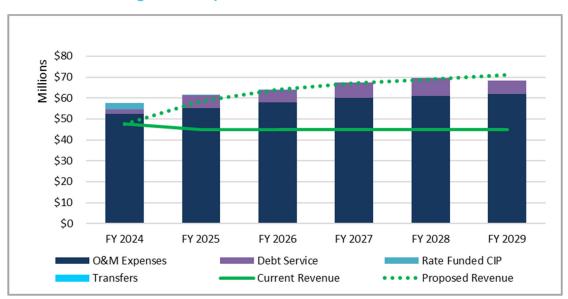

Figure 5: Proposed Solid Waste Financial Plan

Table 45 shows proposed Revenue Adjustments for the Rate Study Period and highlights the five-year study recommendation period. Implementation for the proposed rate adjustments were assumed at the outset of each fiscal year beginning on July 1, 2024. As previously discussed, the Revenue Adjustments were reduced from the initial plan presented to City council on December 5th, 2023 to limit the bill impacts to customers associated with additional changes due to the cost of service allocation. Several Revenue Adjustment scenarios were presented to Council at the meeting and Council supported Scenario 3. Scenario 3 can be described as fully funding the projected revenue requirements with greater near-term rate adjustments, but lower overall increases over the five years relative to Scenario 4 which represented the phase-in option with the same funding requirements. It is recommended that the need for any future identified Revenue Adjustment be reviewed in the Fiscal Year 2028 or earlier in the event of a significant change in conditions during the recommendation period which would necessitate a change in rate revenues (i.e., changes in customer demands, regulations, cost of contracted disposal, etc.).

Effective Date	Preliminary Plan (Scenario 3)	Adjusted & Recommended Plan
July 1, 2024	50.00%	33.00%
July 1, 2025	8.00%	10.00%
July 1, 2026	5.50%	5.25%
July 1, 2027	5.00%	3.00%
July 1, 2028	3.00%	2.84%

Table 45: Proposed ER Fund Rate Revenue and Associated Fee Adjustments

The table below shows the proposed capital financing plan over the Rate Study Period. The Study assumes that capital is funded by Reserves, existing debt proceeds, proposed capital leases, and future proposed debt

issuances. It is important to note that this proposed scenario assumes allowances for capital needs for going concern of operations (including a new MRF) and addresses the level needs associated with additional routes.

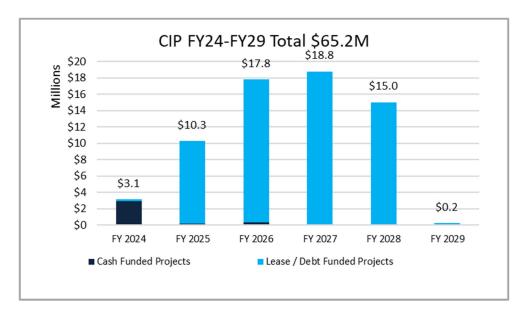

Figure 6: Solid Waste Capital Financing Plan

The Figure below shows projected operating ending balances over the Rate Study Period relative to the City's total Reserve targets under the proposed financial plan. Based on the increases in budgeted operating expenses, capital, and existing revenues the operating fund has been depleted with minimal rate adjustments over a decade. Assuming implementation of the recommended rate revenue and fee adjustments, the City is projected to achieve 50% of the targeted minimum Reserve target and is projected to rebuild such Reserves in the final year of the Rate Study Period.

Figure 7: Proposed Ending Cash Reserves

5. Solid Waste Cost-of-Service Analysis

As previously described, the process of determining the cost-of-service begins with the allocation of revenue requirements and income and funds from other sources among the various services and customer classes. The main difference in costs among the customer classes relate to the frequency of collection, container size, waste generation, and services provided (i.e., residential customers receive collection services weekly for all three material streams). Additionally, the City relies on different fleet configurations to provide service for the various customer classes including the residential, commercial and industrial service classes. After costs are allocated by customer class, the equivalent units are then calculated based on the product of the container size and collection frequency, among other considerations, to calculate an equivalent unit cost. The equivalent unit costs are then used to calculate the rates for service based on the size and frequency of collection. In development of the proposed rates, the cost-of-service presents the final year of the cost allocation as Fiscal Year 2029. The rate schedules developed for the Fiscal Year 2025 through the Fiscal Year 2029 are based on the cost allocation and the Revenue Adjustment previously discussed throughout this Study. This section presents the details of the cost-of-service analysis conducted for the City's solid waste services to customers.

5.1. Allocations of Net Revenue Requirement

Net revenue requirements are defined as the net costs to be recovered from the proposed rates or fees for service. They are calculated by taking the gross revenue requirements comprising the operating expenses, debt service, and other costs, less income and funds from other sources resulting in the net revenue requirements. A cost-of-service analysis distributes a utility's net revenue requirement (net costs) based on service to each customer class. Pursuant to the City's budget, operating costs are functionalized by cost center and function. Table 46 provides an overview of the operating budget cost center functions. These costs were then allocated to the customer classes based on several factors such as tonnages, Equivalent billing units (EBU) primarily determined by the service frequency times the number and size of containers, number of containers, capital costs of vehicles by service type and other factors as presented in Table 51. Appendix E provides details concerning the assumptions in development of the allocation factors and Appendix B provides details concerning the line item allocation of costs.

The cost allocation factors were developed after review of the City's operating budgets and interviews with City staff. The factors were based on our understanding of the nature of the costs in order to assign reasonable appropriate cost allocation factors. Table 46 below provides a summary of the description and function of the City's current operating budget cost centers which account for the majority of the allocated costs.

Budgetary Cost Center	Cost Center Description
ER Administration	Overhead costs and Infrastructure Use Fees (IUF) Payments. Note IUF Payments are charged to residential single family residences only and do not apply to other residential units such as apartment complexes and mobile home parks.
ER Cleanup and Illegal Dumping	This cost center includes bulky collection staff for residential service. Costs in the study only reflect bulky collection service costs.
ER Commercial Collection	Collection and disposal services for commercial can and 2/4 cy bin trash, recycling, green waste, and organics
ER Industrial Collection	Collection and disposal services for industrial >4 cy bin trash, recycling, green waste, and organic
ER Material Recovery Facility	Reflects cost to operate the Del Norte MRF predominantly related to recycling, however also includes the green waste disposal cost
ER Outreach program	Provides general public education related to the City's solid waste programs
ER Residential Collection	Collection and disposal services for residential 3 cart service
ER Tip Floor Processing and Disposal	Reflects cost of the Del Norte facility scale and tipping floor operations. All materials inbound to the facility are weighed and pass-through the scales.
ER Waste Transfer Haul	All materials for disposal are processed through this cost center, with exception to the green waste disposal costs which are separately accounted for within the ER MRF cost center. The primary cost accounted for in this cost center are the landfill disposal costs.

Table 46: Operating Cost Center Descriptions

In addition to the operating expenses, the City's rates also recover the cost of debt service repayments which can be categorized into either capital lease payments for purchase of vehicles and facility debt service payments issued to fund major facilities such as the Del Norte facility.

The City charges a variety of service fees, receives revenues from the sale of recoverable materials, and generates income from late payment fees and investment on Reserves. Together this income helps offset the cost recovered from rates, which is also referred to as the net revenue requirements as previously discussed.

56

Table 47 presents a summary of the allocation percentages based on the various cost allocation metrics relied upon for the study. The allocation factors are calculated and presented in Appendix E. These factors were developed specifically for the format of the City's operating budget and costs. Since the forecast assumes no growth the statistical data relied upon for the cost allocations remains constant during the Rate Study Period.

Table 47: COS Allocations for Residential, Commercial, & Industrial

1) Allocation factor shown reflects the estimated recyclables within the MSW stream based on State Mandates and Cal Recycle's waste composition estimates plus actual tons recycled by customer class. The allocation factor is used in the COS to allocate the MRF facility costs which was constructed to recover all recyclables from the MSW waste stream.

Shown in Table 47 are the facility debt service allocator and capital lease payment allocator. These two respective allocation factors were based on the existing and proposed debt proceed uses. With respect to the facility debt allocator, the majority of the debt is issued for the Del Norte MRF and was allocated to the recycling function. With respect to the capital lease payments, such costs were allocated based on the cost of the fleet assignable to the various services and functions by cost category and customer class. The allocation factors were then applied to the projected revenue requirements of the Division including a detailed allocation of the operating expenses by cost center and object code line item. Table 48 presents a summary of this allocation, which is presented in greater detail within Appendix C.

Table 48: Fiscal Year 2029 Revenue Requirements Allocation Assumptions

5.2. Calculated Equivalent Billing Units (EBUs)

Equivalent billing units (EBU) are necessary to calculate the unit cost for the purpose of calculating the proposed rates. EBUs are developed by customer class and are generally calculated by taking the customer's container volume times the frequency of collection. Special adjustments are made for specific rates where service levels are not equivalent such as for additional carts, weekend service, and compactor service. Table 52 provides a detailed accounting of the EBUs.

Descistion	2020	Annual Tips	Capacity	Calculated EBU	% EBU
Description	2029	/Pulls	(gal)	(gal/yr collected)	Allocation
Residential 3-Cart Service:					
3 Cart Service - 64 Gallon Trash	4,136	52	256	55,061,760	6.00%
3 Cart Service - 96 Gallon Trash	29,083	52	288	435,544,665	47.49%
Extra Container	3,189	52	96	15,920,736	1.74%

5.3. Rate Design

This section on the rate design will present how we calculate the cost of service rates for the Fiscal Years 2025-2029. The methodology starts with the cost of service for the Fiscal Year 2029, then the Revenue Adjustment are applied to determine the prior fiscal year rates and develop the rate schedule. Table 52 presents a recap of the calculated unit cost per EBU for the residential and commercial class as was represented earlier in Table 49.

Collection Categories	OpEx	Debt	Income & Funds	Net Revenue Req	EBU's	Unit Costs
Residential Containers - Trash	\$6,625,303	\$584,182	\$476,163	\$7,072,518	181,561,267	\$0.0391
Residential Containers - Recycling	\$3,745,040	\$2,778,318	\$2,204,124	\$4,536,818	175,813,715	\$0.0259
Residential Containers - Green Waste	\$3,745,040	\$463,503	\$158,592	\$4,253,969	175,813,715	\$0.0243
Commercial Container Trash Service (96 gal)	\$81,936	\$60,127	\$4,097	\$144,916	2,068,768	\$0.0700
Commercial Container Trash	\$10,403,803	\$603,635	\$275,376	\$11,272,697	255,203,844	\$0.0442
Commercial Container Organic (64 gal)	\$48,195	\$119,609	\$4,372	\$171,665	1,697,141	\$0.1011
Commercial Container Recycling & GW	\$1,661,020	\$881,993	\$740,534	\$1,893,281	60,047,438	\$0.0319
Industrial Roll-off Collection Only	\$3,152,831	\$390,391	\$132,298	\$3,582,752	67,228,985	\$325.79
Disposal Categories						
MSW	\$28,076,417	\$597,682	\$1,120,141	\$28,942,006	254,954	\$113.52
Recycling	\$1,307,558	\$30,713	\$71,148	\$1,330,956	24,872	\$53.51
Green Waste	\$2,312,532	\$41,291	\$86,546	\$2,381,492	18,663	\$127.61
$C\&D^1$	\$4,013	\$142	\$201	\$4,153	n/a	n/a
Organics	\$679,313	\$7,429	\$22,039	\$698,188	3,358	\$207.92
Total	\$61,843,001	\$6,559,016	\$5,295,631	\$66,285,411		

 Table 53: Calculated Unit Cost per Equivalent Billing Unit (EBU)

1 The City doesn't process significant quantities of C&D and therefore an alternative methodology based on the average cost per ton of the ER tipping Floor and waste haul transfer plus the direct cost of disposal at the City's disposal site was developed.

The unit costs calculated in Table 53 are factored based on the various rates proposed within this study based on the associated type of service and level of service. Example calculations of the rate design methodology in support of the proposed rates is included in Appendix D.

Table 54: C&D Tipping Fee Determination

		FY2025	FY2026	FY2027	FY2028	FY2029
Description	Current	7/1/24	7/1/25	7/1/26	7/1/27	7/1/28

Table 63: Proposed Five-Year Schedule of Monthly and Daily Rental Rates for Industrial Bins

Table 64: Proposed Five-Year Schedule of SOLID WASTE Walking Floor Transfer Trailer Rates for Industrial Service per Pull/Transfer

		FY2025	FY2026	FY2027	FY2028	FY2029		
Description	Current	7/1/24	7/1/25	7/1/26	7/1/27	7/1/28		
53-Foot Walking Floor Trailer#	\$371.85	\$384.86	\$398.34	\$412.28	\$426.71	\$441.64		
Note this service rate is a specific rate for an industrial customer receiving direct haul service to the Simi Landfill from the Customers								
Property located within the City.								

Table 65: Proposed Five-Year Schedule of Del Norte and Industrial <u>TIPPING FEES</u> per Ton of Weighed Material and the Security and Contamination Prevention Fee

Description	Material Type	Current	July 1, '24	July 1, '25	July 1, '26	July 1, '27	July 1, '28
Del Norte Tip Fee	Solid Waste	\$55.59	\$93.88	\$103.27	\$108.69	\$111.95	\$113.52
Del Norte Tip Fee	Recycling	N/A	\$44.26	\$48.68	\$51.24	\$52.77	\$53.51
Del Norte Tip Fee	Green Waste	\$62.81	\$105.53	\$116.08	\$122.18	\$125.84	\$127.61
Del Norte Tip Fee	Organics	N/A	\$171.95	\$189.14	\$199.08	\$205.05	\$207.92
Del Norte Tip Fee	C&D	\$66.92	\$130.98	\$131.78	\$139.92	\$143.48	\$147.13
Del Norte Tip Fee	Tires	\$180.00	\$272.00	\$280.16	\$288.56	\$297.22	\$306.14
Walking Floor Transfer Trailer Tip Fee ¹	Solid Waste	N/A	\$34.63	\$35.67	\$36.74	\$37.84	\$38.98
Security and Contamination Prevention Fee (Per Bin) ²	All Containers	\$0.12	\$0.12	\$0.12	\$0.12	\$0.12	\$0.12

1 Represents the tip fee for walking floor trailers direct hauled to the Simi Landfill. This rate is not applicable to refuse delivered to the Del Norte facility.

2 The City charges a security and contamination prevention fee to all customers per bin per month. In most cases the fee is included in the collection rate for service, however for industrial customers the collection rate is per pull and in some cases the customer may own the bin. Therefore the rates shown are applied in instances where the industrial customer does not rent a bin from the City.

Table 66: Proposed Five-Year Schedule of Commercial Bin Rental Service for Construction and **Demolition Projects for 10 Cubic Yards and Larger Bins**

	CURRENT FEES										
Container	Material	Delivery	Per Empty	Initial Cost	Disposal Min.	Prepay
